

1. Create a home page for a college website containing all latest HTML5 tags like `<aside>`, `<nav>`, `<header>`, `<footer>`, `<section>`, `<figure>`. In `<nav>` create hyperlinks for courses, facilities and contact details of your institution. On clicking
 - Course hyperlink, display the page with course names offered in the college using ordered list.
 - Facilities hyperlink, display the page describing the facilities using unordered list.
 - Contact hyperlink, display the page to show phone number, email and address in separate columns with respective headings.]Apply various text formatting tags such as for bold, italic, font style.

```
<!-- A1.html -->
