

A6. Develop and demonstrate a HTML file that includes JavaScript script that uses the functions for the following problems:

- Accept a string as input and the function to be used to print the position of first vowel as output in a label.**
- Accept a number as input and the function to be used to print the reversed no. in a label.**

```
<!DOCTYPE HTML>
<html>
<body>
  <script type="text/javascript">
    var str = prompt("Enter the Input","");
    if(isNaN(str))
    {
      str = str.toUpperCase();
      for(var i = 0; i < str.length; i++)
      {
        var chr = str.charAt(i);
        if(chr == 'A' || chr == 'E' || chr == 'I' || chr == 'O' || chr == 'U')break;
      }
      if( i < str.length )
        alert(str+" The position of the left most vowel is "+(i+1));
      else
        alert("No vowel found in the entered string");
    }

    else

    {
      var num,rev=0,remainder;
      num = parseInt(str);
      while(num!=0)
      {
        remainder = num%10;
        num = parseInt(num/10);
        rev = rev * 10 + remainder;
      }
      alert("Reverse of "+str+" is "+rev);
    }
  </script>
</body>
</html>
```

OUTPUT

This page says

Enter the Input

OK

Cancel

This page says

MANGALORE The position of the left most vowel is 2

OK

This page says

Enter the Input

OK

Cancel

This page says

No vowel found in the entered string

OK

This page says

Enter the Input

OK

Cancel

This page says

Reverse of 1234 is 4321

OK
